**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 10-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 10-13 disclose a, "recording medium." This disclosure is directed to non-statutory subject matter.

***Allowable Subject Matter***

3. Claims 1-4, and 6-9 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The Independent claims have been amended to more particularly define the "remaining period." The independent claims recite predetermined time slots in a plurality of frames consecutive over a predetermined period are allocated to a terminal apparatus. The base station also allocates, to another terminal apparatus, predetermined time slots in a plurality of frames consecutive over a period other than said predetermined period. A change determination unit determines to change the transmission rate for a terminal apparatus if a remaining period is equal to or greater than a threshold value, and determines not to change the transmission rate if the remaining period is not equal to or greater than the threshold value. As recited in the claims, the remaining period is a period between the planned timing for changing a transmission rate and the end timing of the period defined by a plurality of frames in which time slots are allocated.

various measured "link quality parameters." Olofsson does not, however, disclose or even suggest determining whether to change a transmission rate based on a remaining period. In Olofsson, it is the measured "link quality parameters" which dictate whether a change is to be made, not a remaining period as defined in the pending claims.

#### ***Response to Arguments***

4. Applicant's arguments with respect to claims 10-13 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***
